This remote needs no programming to control the unit it was provided with, has no codes to enter, and has all the functions needed to control your unit with ease. It is easy, pull it out of the professional packaging, insert new batteries, sit back and watch it work. And we are not talking about just putting new batteries in. All units we sell are in stock, and promptly ship the same or next day. All remote controls are thoroughly tested and professionally packaged. Your information is never sold and is never transferred to anyone. It is only used for the purpose of promptly delivering a quality product to your doorstep. Our experience in listening to our clients is they are of inferior

quality, and many times do not function the same as an original OEM branded replacement remote control. Many clients come to us after their recent generic purchase has failed, or does not operate the way the original replacement did. Some report having to enter codes to program the remote to function properly. There are many clever ways these are marketed. Infra Red light cannot be seen with the naked eye. So not seeing this infra red light has no indication as to whether the remote is functioning properly or not. Good News! Infra red light be seen with a smart phone in the selfie mode. Just point it at the smart phone in selfie mode, and press buttons. You should see a flash of infra red light as the buttons are depressed on the remote control. This means the remote is functioning. If the infra red light stays on constantly, or never comes on, the remote is defective. See more in the troubleshooting link at the top of the page. However, if you need help, let us know. We will attempt to find the manual for your specific manual and email it to you if needed. This is a free service we provide to our clients. It will not need any additional codes or programming for that. However, lets say you are replacing a TV remote.

It will operate the TV without a need for programming, but it may offer an option to control additional devices such DVD, or Audio unit it was not supplied with. This is where you would need an operations manual that gives programming instructions with codes. Not for the unit it was asupplied with, but for the convienance of controlling other devices you may own with a single remote control. Maybe you still need our expertese to help you find the right remote, or determine whether your controller has a problem. Visit our troubleshooting link above, that answers the vast majority of problems you may have. If you still need help, click on contact us and leave us a message. We generally answer all messages the same or next day. You can call or text us as well, the number is at the bottom of the page. Please leave a message if we we do not answer. We will return your call. Whether you need help troubleshooting, codes, programming or a manual, it is very helpful if you provide us with both the model number on your remote control, and the model number of the unit it controls. Email is always best too. We can deliver manuals, links to the product you are looking for, or links to other sites on the web if we do not have the product you need. That is right, if we do not have the remote you are looking for, we will help you find it! It is also covered by a lifetime warranty covering normal wear and tear defects. See the difference we can make with your purchase from RemoteControlDepot.com. This provides great causes with the benefit of an easy practical, fund raising opportunity. We employ foster children, mentally challenged individuals, as well as those recovering from substance abuse. Keeping jobs right here in the USA, and hiring those who benefit the most has always been our vision. By refurbishing, and remarketing these remotes, we keep our dollars right here in the USA. Does not Works with the CW600s, CW600s Premium, CW650s, To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. JJ 1.0 out of 5 stars There was NO accompanying literature or instructions of any kind included.

After installing 2 fresh batteries I attempted to turn on my tv. Of course it did not turn the tv on. The only reaction I got in pressing various buttons was the red indicator light on the remote blinking with each press of a button. At least I knew the batteries were good. Why would anyone sell a remote control without including instructions on programming it to the various brands of electronics its supposed to operate. This is the question I asked Amazon. The beauty of being an Amazon customer is that the consumer may make a purchase without the fear of being ripped off by an unscrupulous purveyor of merchandise on its site. Amazon issued me a refund of my purchase price on this useless device. I had to order this remote because I broke my old one. Shipping was fast and packaging was good. I just had to put in batteries, turn it on and choose the CW 800s button and it will work right away. I was unable to find any instructions on the web, so it is currently a paper weight. Amazon prvided excellent customer service by promptly refunding my money. Excellent price. Works great with the CW800. Thanks for the producer. I had no problem with it, and it was a good product. Im very happy with the item i bought. The initial setup of the CaptiveWorks FTA receiver is a fairly straightforward one. Step 1 Press the "Power" button on the front of the device to turn the CaptiveWorks receiver off. Step 2 Connect the CaptiveWork FTA receiver to the TV by plugging the RCA connector cord into a digital audio port in the back of the receiver and the other end into the RCA connector port in the TV. The type of cord used depends on the type of TV you have. Step 3 Plug the satellite cord into one of the two "Satellite" jacks on the back of the CaptiveWorks receiver. The display settings screen appears on your TV screen. These settings need to match up with the video capabilities of your TV. Consult your TV manual for the appropriate settings here.

Press the "Power" button to turn the receiver off, and then press the "Power" button again to restart the receiver for the settings to take effect.
