To remove any water left over from testing procedures, the first washing cycle should be carried out without laundry in the machine. Never wash new multi coloured items together with other items. White items may become grey. Always wash white and coloured items separately. Items of clothing that have been pretreated with sol vent based cleaning agents, e.g. stain remover and dry cleaning spirit, represent an explosion hazard once loaded into the washing machine. Therefore, these items must first be rinsed thoroughly by hand. Caution Loose debris in the washing machine drum can damage the laundry. Dispensing the Keep detergents and additives out of the reach correct amount of children. This information can be obtained from your local water authority. the amount of laundry. Dispenser 2 Cleaning product, e.g. fabric softener, fabric conditioner. Fill at least to lower edge of insert 1. If the liquid additive is thick, mix with a little water before dispensing prevents clogging of the over flow. We do not recommend washing these textiles with other rougher textiles. To treat very delicate silk textiles even more gently, reduce the time by pressing the I Reduced Time button. Recommended load amount Up to a maximum of 3 kg. Water and energy consumption is therefore reduced when washing small amounts of laundry. Unbalanced load detection system The automatic unbalanced load detection system spins the washing several times to ensure even distri bution. The Ready control light comes on. Example Where required, press the option buttons for additional functions. Press the M Start button. The Active control light comes on, and the pro gramme starts. Turn the programme selector to the desired pro gramme. The Ready control light comes on. Press the M Start button. The Active control light comes on, and the new programme starts. Turn the programme selector to Off, and, where required Select a programme option b Drain, B Spin or K Rinse. Press the M Start button.

<https://climatechange-news.com/images/canon-pixma-mp160-user-manual.pdf>

At the end of the programme option, turn the pro gramme selector to Off. Pre soak Add the presoak agent to chamber II according to the manufacturers specifications. The Ready control light comes on. Press the M Start button. The Active control light comes on, and the pro gramme starts. Add the starching solution to chamber I. Close the detergent dispenser. Always disconnect the appliance from the mains before cleaning. Never clean the washing machine with a jet of water. Never use solvents to clean the appliance. As required Cleaning the q Use hot soapy water or a mild, non abrasive appliance housing. Pull up the insert. Rinse the detergent dispenser under hot running water. The

pump is blocked by either pump loose debris or fluff which accumulates if fluff giving fabrics are washed. Select the b Drain programme. This is necessary if very little or no water flows into the Cleaning water inlet washing machine. Pull out the strainer and rinse under running water. Insert the strainer and reconnect the hose. Turn on the water tap and check whether water is still discharged. Repairs must only be carried out by our Customer Service or an authorized technician. If repairs are needed, and assuming that you cannot eliminate the fault yourself with the aid the following table Turn the programme selector to Off. Press the M Start button. L Rinse or B Spin programme selected maximum spin speed 800 r.p.m. Repeated spinning at This is not a fault. This is not a fault. This is because consultation provided by our technicians, even within the warranty period, will lead to costs being incurred by yourself. Your nearest Customer Service centre can be found in the index supplied. Safety information The washing machine is heavy. Take care when lifting it. Do not install the washing machine outdoors or in an area prone to frost. Depending on the connection situation 1 hose clip 2440 mm DIY store is also required for connection to a siphon. The installation area must be solid and even.

Soft floor surfaces, such as carpets or surfaces with foam backing, are not suitable. If the washing machine is to be installed on a wood joist ceiling If possible, place the washing machine in a corner. Do not connect the appliance to the mixer tap of an unpressurized hot water boiler. If in any doubt, have the water connection carried out by an authorized technician. The water supply hoses must not be bent or squashed. Water drainage Caution Do not bend or pull the water drainage hose. Height difference between the placement area and drainage point maximum 100 cm. Levelling procedure The washing machine must not wobble. Level the washing machine with the assistance of the four adjustable feet and a spirit level Loosen the counter nut 1 using the wrench. Adjust the height by means of turning the appliance foot 2. The mains voltage must correspond to the voltage specification on the washing machine nameplate. Connection specifications as well as the required fuses are stipulated on the appliance nameplate. Release the water pressure in the supply hoses refer to Page 29. Drain any residual washing solution refer to Page 28. Disconnect the washing machine from the mains. Dismantle the supply and drainage hoses. Send a Houzz Gift Card. Its a Bosch WAS2016UC. I downloaded the manual from Bosch but still cant figure it out. Does anyone know where is for what I think the middle one is for fabric softener. Also, can you use liquid bleach. And, if so, where does that go In my search for this information Ive been really horrified to read about all the negatives experiences with this washer due to mold and smell. I am really hoping for the best here. Im kind of at my wits end. Thanks to all for any info. Q Comments 20 Sina Sadeddin Architectural Design I am laughing really really hard right now about the garage. I am lucky to have a spot in the garage for my car as well. I have waited years for this reno because I let them get their cars first. Painted Ranges.

[www.theagentpipeline.com/wp-content/plugins/formcraft/file-upload/server/content/files/1626c37fc7fee7---a-car-with-both-automatic-and-manual-transmission.pdf](http://www.theagentpipeline.com/wp-content/plugins/formcraft/file-upload/server/content/files/1626c37fc7fee7---a-car-with-both-automatic-and-manual-transmission.pdf)

Which Do You Prefer Poll. Q Comments 14 I would NOT buy a new white enameled range, but might consider a color Its interesting to hear that from you. I recall seeing a picture of your kitchen, and your vintage stove looks gorgeous. It IMHO fits well in that location. Mixing styles can work really well. On the other hand, you are correct and there are a lot of contemporary white appliances that just look and feel cheaply made. It doesnt matter which color they are, if the quality isnt there, the appliance looks bad no matter the surface finish. And the reverse is true as well. Our house has a contemporary design with lots of natural woods, glass and stainless steel. So, both paneled and stainless appliances were a natural fit. If we had decided on a different material palette, I could absolutely have seen powder coated appliances. But then, we picked nicer appliances to begin with; that helps.. See More Outdoor Furniture Cushions What do you do. Q Comments 10 I leave mine out all summer and yes, occasionally flip them up before rain. If were planning a gathering and its going

to rain the day before, I will bring them in the garage. We have a lot of trees so they do get some of that green residue, especially along the seams. The power washer does a pretty good job. The pillows are stored in the winter in one of those storage boxes like Patricia mentioned. I've had most of my cushions for 15 years. I told my husband I think they will be replaced after this year but 16 years is a good long life so I don't mind replacing. We use our outdoor spaces a lot so constantly having to move the cushions just isn't in the cards for me. Our summers up here in the tundra are to be enjoyed! See More What do you think of my kitchen layout. Q Comments 25 You all are fantastic. Thanks to everyone for your feedback, we really appreciate it. We are going to make some changes to the floor plan based on everyone's feedback.

We're going to see what we can do to increase the living room width for better proportions. We will certainly do as you recommend. The master shower may change dimensions a little bit to make sure the freestanding tub is truly free standing and is not a burden to clean around. However, we are looking forward to a large shower. Things get busy and my wife and I love our time in the shower together. It's so wonderful and so appreciated on our end. Our previous house had a slab 4x9 island and we really loved it. We may end up widening the house a couple of feet just to try to get this right while keeping some of our existing dimensions. The SxS ovens will be inwall for sure. You are correct, the garage is 34 wide and 23 deep. We're really only planning for two cars to go in there, but with 3 motorcycles and sleds in the future, we'll see how that goes. My wife is OK with building a toy barn down the road if we feel like shop space is tight. If we end up widening the house 3 or so to solve some other issues I'll make sure each bay gets another foot. For the bathrooms, we're planning on shelves at the bottom of the vanity that can hold a couple of folded towels. We had the attic space so we were planning on getting a truss package to allow for that bonus space. Thank you! We're hoping with reworking the mudroom and making each bedroom have ensuite baths we'll solve most of your concerns. The bonus space above the garage is a concern but I'm not sure we're going to be able to change that much outside of adding a door at the stairs or something like that. Thanks again everyone for all of your thoughts and feedback. SO SO helpful!! When we get the floor plan reworked I'll see about posting it again for another round. See More mskathyny Original Author 8 years ago Thank you so much, daddoes!! You saved the day for me. I assume you don't use bleach. Or only powdered bleach in the II compartment Have a lovely, clean, holiday!

Where is this How do I do this Oh, I guess I'm just supposed to figure it out via trial and error. Also, don't use cheap fabric softener and then as little as possible. Do believe Ecover is plant based. I picked it up on the fly at the health food because the fragrance was OK. Pinky, I'd love you to try it and get your opinion. Will send you some. I think it gives great results. It's my new first choice. This video was actually pretty helpful it's an 8 minute demo on both the Bosch Axxis washer and dryer I actually thought you put the washing liquid in the right compartment, not the left despite daddoes comment, so the video was great to watch and get clarification. Thanks all, and thanks to mskathyny for the question clearly not a dumb one after all! Helps prevent detergent residue build up. Best to check the instruction manual to confirm which. Majority of manufacturers have them available at their web site via model number search. I let it run with no clothes and let it mix with the water for about 20 seconds and then add clothes. If so, does pod go in the far left compartment. Thumbs down and no thank you I just bought a second hand Bosch Maxx from my sister and is my first front loader. I agree with Terry re symbols instead of words to show what to do. Nuts! So it goes, Prewash, main wash and Bleach. What detergents are prewash. I pour softener in the 3rd compartment as it goes straight into the washer. Usually don't bother with the middle or II compartment. Any specific help. I also pour bleach in the 3rd compartment or mix with the 1st compartment. I Use MELLALUCA products and love them.
