Charging Base Only Does Not Include Cord, Instructions, or any other accessories. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Scotto 5.0 out of 5 stars This drop in charger and cleaner is well worth the money. I couldnt be happier. It did not offer this cleaning solution so I was not aware of it until recently. It sounded like a sound idea so I sent for this. It arrived with just the cleaning unit and no directions or solution. I did some research and found that the charging cord for the shaver is also used for the cleaning unit. There were some tutorials online that explained how to use this setup. I got a box of the cleaning solution cartridges through Amazon and cleaned the shaver. It did a very nice job and I will continue to use it. I think it will extend the life of the shaver which seems to be a lot sturdier than the brands I previously used. I would definitely recommend this item. This does a good job of keeping the shaver charged, lubricated, and ready to go. The first one worked for the first few weeks that I owned the Braun Series 7 760cc4 Electric Foil Shaver. The second one never worked. So I dont know if the problem is in the shaver itself, in the cord or the Base Unit. Warning The base unit does not come with a new electrical cord. So the problem may be in the cord. Or in the Shaver, which shaves my whiskers very well. The Shaver is now charged only to 40 percent.

So it may just be a matter of time until it quits too. The biggest problem is none of these items are returnable. So Id recommend you stick to your lather and razor. Or grow a beard. No matter how much I clean the charger they do only last a few years. It gives you the warning that you are out of cleaner. Clean it out and it works for a few days. Have used the canned air and removed all of the hairs. Disappointed it only last a few years but substantially cheaper than the 4 times pricier braun shaver. Small price to pay since the braun shaver, 799, is better than the other electric shavers I have tried. Shipper got it here quickly. Will buy again in another few years. Now I wish I had bought this replacement a long time ago, because the shaver head came out clean as a whistle after the first use. Works perfectly! Factory unit, works great and now have a happy shaver! It uses the charging cord that came with the shaver. Unfortunately rinsing the shaver head under the faucet is just not enough. This unit does a lot better. It charges, but the cleaning liquid recirculation mechanism wont draw liquid. I bought this Braun replacement item with the knowledge that it did not come with a power cable, but in all other respects it looks and works just like the original. From my experience I would say that you can confidently purchase this as a replacement and not be disappointed just dont throw your power cable away! Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again Only for the fact no user instructions included Sorry, we failed to record your vote. Please try again Nice to be able to replace a defunct shaver base, without the cost of a new razor included. Sorry, we failed to record your vote. Please try again Does NOT run a proper cleaning cycle depending on shaver hygiene level. DOES NOT DRY. Will not purchase again. Sorry, we failed to record your vote.

Braun Series 7 Electric Shaver Hands On Review Last updated on June 19, 2020 by Moo Review Released in 2010, the Braun series 7 is definitely the grandfather of electric shavers. The design remains relatively unchanged since it's original release over 5 years ago. Table of Contents Contents Models What's in the Box. Comes with all features. Cleaning station included. Braun Series 7 Electric Shaver Check Price at Amazon What's in the Box. If you open up the box of the series 7 this is what you will see That's a fair bit of stuff.

Let's break it down piece by piece. Starting with the instruction manual I was shocked when I opened the instruction book, it was actually set out in a logical manner AND easy to read. If you have read any of our other reviews Including Braun's top of the line Series 9 then you will fully know my thoughts on Braun instruction manuals They suck. They suck really bad. So it appears that once upon a time Braun was able to make an easy to read instruction manual. But somewhere along the line they lost their way and chose the path of evil, creating the incredibly awful instruction manuals that accompany the rest of their modern shaving line. Next up is the star of the box, the Series 7 Shaver I will be examining the shaver in much more detail further down the review. But for now let's continue exploring the Series 7 box. Those of you who love to travel will be pleased to know Braun has included a protective travel case Curiously, the case is softer than that of the Series 5 and series 7 and gives easily when pressed. Running along the hinge of case is a mesh air vent. This vent will either be your best friend or worst enemy. On the plus side the vent allows air to freely circulate through the case. If you place your still wet shaver inside you won't have to worry about mold or mildew growing inside the case due to the ventilation. But on the flipside, the mesh also allows pieces of dust, dirt and fluff you know, the stuff that sits at the bottom of your bag or luggage to freely enter the case. Of course, if you only shave in the comfort of your own bathroom then chances are you will not even use the travel case at all. Note Braun's website claims that the 790cc4 comes with a "Premium Leather Pouch". The travel case that came our Series 7 box DEFINITELY is not leather. At the bottom of the box you will find a cleaning brush roughly the size of your thumb. If you have ever bought a Braun electric shaver before then this brush will look very familiar.

Braun includes this brush on just about every single one of their electric shavers. There really isn't much to say about it. It may be a cheap bit of plastic with bristles but it gets the job done when you need to sweep away hair clippings. But if you want the best possible clean for your shaver then you won't even look twice at the cleaning brush. The cleaning station is where it's at Not only does the handy little dock clean your shaver without any effort on your part, but it also recharges it too. In our opinion Braun's cleaning stations work better than any other of the big name shaver brands. The secret behind this hides inside the Cleaning Cartridge Inside the cleaning cartridge is an alcohol solution that not only cleans but also lubricates the blades of the series 7 shaver. Braun is the only electric shaver brand to use an alcohol based solution and there is a reason for this Many delivery services classify alcohol in any quantity as a hazardous substance. As a result, this shaver will be shipped by ground if you live in the USA. If you plan to order internationally have it shipped by air it is likely you will have to pay a hazardous materials handling fee, although this is generally a fairly small amount. Finally we come to the last item in the box, the charger I am not happy to see the return of Braun's annoying curly cord charger. You know that coiled cord you find on your office phone. That's exactly what Braun has chosen to go with. While coiled cords are no doubt fun to play with and wrap around your finger nicely, it hides a serious problem. The cord is short. VERY short. Even when fully stretched out it is shorter than any other electric shaver brand. This can cause a bit of a headache if your power outlet is a fair distance from where you want to charge your shaver. And

that is the last accessory you will find in the Series 7 box. Now let's take a closer look at the shaver itself.

Braun Series 7 Electric Shaver Check Price at Amazon The Braun Series 7 Electric Shaver If you have even glimpsed the other shavers in Braun's "Series" range then the first thing that will hit you is just how dated the Series 7 looks. But you know the saying If it ain't broke, don't fix it That is very likely the road Braun has decided to travel down. The Series 7 is perhaps the most popular out of Braun's entire shaver range and messing with it's design is just asking for backlash from it's loyal fan base. While the design is a little dated, it is in no way ugly; not like Remingtons effort on the Smart Edge or the HyperFlex. While unintentional, the matte gunmetal colored exterior has one benefit over the other shavers in Braun's range. It is NOT a fingerprint magnet. While the polished chrome beast that is the Braun series 9 may look nice out of the box, it does not stay like that for long. Finger prints and watermarks are incredibly visible on it's shiny surface. Towards the center of the shaver you will find the power button. And to be frank; as far as power buttons go, it sucks. Look closely at the power button in the picture above. You would assume that you could press the entire silver ring to turn the shaver on. Unfortunately, this just isn't the case and unless you press that really small blue button in the center, you will be unable to turn the shaver on. Now the reason for this is the Braun series 7 doesn't actually have a travel lock. So the design team has deliberately made it difficult for the button to be pushed by mistake at the bottom of your bag or suitcase when you travel. But the end result is that it makes turning on the Series 7 Shaver a much trickier job than it needs to be. If you shave exclusively in the comfort of your own bathroom then this feature is pointless Just below the power button you will notice two silver semicircles, maked with a "plus" and "minus".

These are used to cycle through one of three different speed settings, from sensitive to intensive. Further down the handle, just below the Braun logo, you will see a small little indentation. This is the reset button. When your shaver hits 18 months of use, a "change shaver head" logo will appear on the indicator screen. Pressing the reset button with a pen when you have changed the shaver head will reset the internal timer so that the warning can appear 18months later again. It seems odd that a button that only needs to be pressed once every 18 months is located in such an obvious spot on the Series 7 body. The shaver would definitely look better without it. At the base of the shaver body is a circular LCD screen Every other electric shaver in this price range uses easy to see lightup indicators. To show you your remaining battery charge. Not the series 7. Instead, on the base of the shaver you will find a small LCD display screen, similar to what you would find on a calculator. And just like a calculator screen, it is easiest to read in bright light. Shaving is basically the first thing I do when I wake up. And I had trouble reading the screen as my eyes tried to adjust to the day. Even the lower model Series 5 shaver we reviewed has a bright easy to read screen. Like all the other Braun shavers, a trimmer is included to help detail your goatee, mustache or sideburns. Unlike the other Braun shavers, the trimmer is found on the front The beard trimmer sticks out horizontally to the body of the series 7. Just like the Panasonic Arc 5 I reviewed earlier. I am a huge fan of the horizontal trimmers. They are much easier to to use than the trimmers that sit too close to the head of the shaver. The horizontal design makes it much easier to see the area you are shaving. To activate the popup trimmer you place your thumb over the four silver ridges on the front of your Series 7. With your thumb in place, you slide the ridges up and; as if by magic, the trimmer pops up.

Maybe I have been spoiled by the incredibly smooth release found on the Series 9 and Series 5 They have the same trimmer. But releasing the popup trimmer of the Series 7 is jerky and difficult. Too much pressure was required to slide the release for my liking. And if you have shaving cream or water on your hands then your thumb can slide right off, without releasing the trimmer. Once the trimmer has popped up it cuts well enough. We found the trimmer to be ideal for detailing on the go. But if you want something to routinely trim your bushy beard then you are better off buying a

dedicated beard trimmer. It is also worth mentioning that the trimmer works best when shaving with downward motions. We often found the trimmer folding back down when upwards motions were used. The rear of the Braun Series 7 is much less exciting than the front. The rear of the Series 7 is dominated by black rubber. The rubber is very easy to grasp, even if your hands are covered in shaving foam. About a third of the way down the rear you will notice two metal studs. The cleaning station charges your Series 7 Shaver through these studs. Rather than needing to constantly plug and unplug the charging cord, you simply place the shaver in the cleaning station and your Series 7 will immediately begin to charge. Easy peasy. Of course if you do still want to use the charging cord you have that option to. Located towards the bottom of the rear is the charging socket. Simply plug the charging cable in here and your shaver will start charging away. With the body of the shaver thoroughly examined it's time to take a closer look at the shaving head. The shaving head is made up of three separate parts that have very obviously been named by Braun's marketing department: ActiveLift Trimmer. The center trimmer on the shaving head lifts and cuts flat laying hairs like the kind you often find on your neck. OptiFoil. The two outer foil guards give a close finishing shave.

While this set up may have once been revolutionary, it is pretty much standard on most foil shavers you will come across nowadays. In fact, it is SO STANDARD that Braun uses the exact same cutting head on their Series 5. Check it out. The only thing different is that the metal base of the Series 5 shaving head is slightly taller than the series 7. Still not convinced. You can actually take a Series 7 shaving head, whack it on your Series 5 perfectly. Oh, and it even works perfectly when you turn the shaver on. So that begs the question: Why would you choose the Series 7 over the series 5? I'll be honest. As of this point in the review I cannot tell you. And that is a worry. Let's soldier on and hopefully I will be able to come up with an answer to this very important question. Like the Series 3, 5 and 9; the Series 7 shaver uses an irregular foil pattern. Braun is the only shaving company to use an irregular foil pattern and we are somewhat puzzled as to why that is. If anything we found that the uniform foil pattern in the Panasonic shavers cut slightly better. Each of the three shaving heads can pivot left and right. This allows the shaving heads to remain in contact with your skin as you shave over contoured areas of your face such as your jaw line. But it's not just the shaving heads that are flexible, the whole shaving block itself can move back and forth. The pivoting shaving heads and block work together to ensure the blades remain close to your skin no matter where you shave. A button on the side of the shaving block allows you to lock the head into a single position. I found it much easier to shave under my nose without all the extra movement. Update: After just four weeks of use there was a point where I forgot the lock was on and attempted to move the shaving head. CRACK. I don't know what broke, but something did and I am now unable to lock the shaving head into position. The funny thing is that I didn't even apply that much pressure.
