The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Amazonian 4.0 out of 5 stars Computerized and with a lot of features my other sewing machines lacked, I thought it was going to take me a long time to get it up and running, not to mention getting used to it. Set up is very easy, manual is extremely user friendly and simple to follow and well illustrated. This machine rocks! The embroidery quality is over the top I would have expected this quality from a much more expensive machine. It sews like a dream. More than worth what I paid for it. There is no way you can mess up embroidering with this machine the onboard computer walks you through every step. If your bobbin is not threaded correctly, the machine beeps and displays a message about what the problem is you dont have to guess. This machine takes the hassle out of threading the needle and bobbin. The Thread Cassette works very well. I was skeptical about just placing the bobbin in its case without pulling it up through the plate, but it works perfectly. And you will LOVE the setting to auto cut the thread when embroidering. The reason I didnt give this machine 5 stars is because of an issue I and two other friends experienced with winding the bobbin. I recommend you set the speed control all the way to the left slowest or no faster than the middle setting medium speed.

I cranked it all the way up on high, like the book said. The thread somehow managed to slip off the bobbin and wound around the spindle below the bobbin. A word of caution keep an eye on your bobbin and wind it slower than what the book recommends! I was interested in doing some things but didnt want to spend a lot of money on a machine as I didnt know if I would really like embroidering. As a novice, I didnt want to deal with anything too complicated. WOW, what a surprise. I love this machine!! I have never embroidered anything in my life. Opened the machine

and within an hour had embroidered my first design. It was only my initials but I couldn't believe how easy it was with this machine. I'm hooked! No doubt I have much to learn about embroidering, but for me, I couldn't have found a better machine. It's GREAT!!! Very happy I chose this machine. I bought this for her for Christmas as she really wanted to go beyond her very basic sewing machine. The number of projects she has completed with this machine is incredible; which speaks towards her enjoyment of the art and using this tool. Downloading new patterns to the machine is extremely easy. She loves the ease of use of the embroidery feature. Accessories are easy to come by and fairly inexpensive. She just bought a foot and finished off a neighbor's prom dress. We originally looked at much more expensive machines; however, I gambled that this machine had the features and price that a hobbyist would use and could afford. Luckily we were right; the machine has worked flawlessly in the past 5 months. But the cost was always prohibitive. This machine is worth every penny and then some. I started sewing as soon as I set the machine up which isn't hard to do. Even a beginning sewer will be able to use this machine without a problem. The same for the embroidery. The only downside is that there are so many accessories that I want, I can't choose!
