Please try your search again later. The 78,000word, builtin dictionary encourages letterperfect spelling. Unique features include its international keyboard, bonus international daisy wheel and the Perfective professional touch keyboard. Typewriter offers easy access to the characters necessary for typing in a number of languages, including English, Spanish and French. Typewriter uses Brother 1030 correctable ribbon. It includes an interchangeable cassette daisy wheel that is easy to install and allows you to type using English, Spanish, French, or Portuguese characters. Plus, a 16character LCD allows you to find and correct errors quickly. The ML300 provides many automatic timesaving features and allows you to type at a speed of up to 12 characters per second. Its automatic paper insertion ensures that each page is positioned exactly one inch from the top margin. It includes automatic centering, underlining, bold printing, and right margin flush. You can easily erase a word or an entire line with just the touch of a key using the automatic correction system. Its oneline correction memory with automatic relocation makes using the ML300 almost like using a word processor. The ML300 supports superscripts and subscripts, onetouch tab set and clear, selectable line spacing, and framing capabilities to outline specific areas of the page. The sleek design includes a paper support that doubles as a lid cover and a carrying handle for convenient portability. <http://www.axi-hohenstein.de/userfiles/da-6000-impact-manual.xml>

The ML100 has less features than the ML300, while the ML500 offers additional features beyond the capabilities of the ML300. With the ML300, you are able to easily access the characters necessary for typing in a number of languages including English, Spanish and French. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. B. Gildner 1.0 out of 5 stars I didnt get one that works. And these were the problems we discovered in the first couple minutes of trying to use the product; who knows what else didnt work right either. Normally I wouldnt have purchased a product with as many negative reviews for flat out not working from the day the package was opened as this item has. But as others have said, theres basically nobody making these things any more, so I didnt feel I had much choice. Unfortunately I got one of what appear to be the many defective ones. The ink ribbon and correction tape were already installed when it arrived although I popped them out to look at them and popped them back in, super easy! I bought it for my 9 year old daughter to write stories on and we have both been using it with no problem. I was nervous about purchasing this typewriter because I read some reviews that said you cant see what you are typing and that its hard to set up, but we have not experienced that at all. We

can easily see what we are typing and find it pretty self explanatory to set up and use. We are very happy with this purchase! If I could give negative stars I would. Every time I go to type something the flimsy film ribbon is all balled up and I have to take the cartridge out and straighten it out. If I use the correct function then THAT ribbon gets all twisted and in the process it twists up the carbon ribbon. <http://www.zajazdszalas.pl/userfiles/da-50-r-manual.xml>

You cant see what you are typing or even where to start. If you are attempting to fill out a form, good luck positioning the print head where you want it. This would make a good door stop, but thats about it. I should have opted for a refurbished IBM Selectric! But like some of the other reviewers said, its a pain to use. But the margins drive me nuts when you put the paper in along the guide on the left, youd think it would then let you type within a halfinch or so of that edge. But no, it wont let you get within a couple inches of the edge. Then when I get to the right side of the paper, same thing and I remove the paper again and shift it to the left. I just need to study the margins in the manual and maybe I can figure out an override, if I could then I guess it would be a pretty good machine. But it also has a bug in it, probably just my machine once you put it in shift lock, you cant unlock it unless you turn it completely off. Grandkids asked what kind of computer is that. Found some carbon paper, great for cards! The box was crushed and the typewriter did not fit properly in the box. Just wrapped in some bubble wrap. No manual or paperwork. Stated that this typewriter was slightly used. Not true. The platen is very worn, type marks showing heavy on the entire platen. Shows a lot of wear on the case and clear plastic area. He loves this type writer. It came in secured packaging and it works great! In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading.
